Monitoring atmospheric  
composition & climate

Issue 1 – November 2009

- **MACC web site on-line at <http://www.gmes-atmosphere.eu>.** The new MACC web site went live last month providing information about the project as well as all currently available services.
- **MACC near-real-time global assimilation system upgraded to latest ECMWF operational cycle.** The global analyses and forecasts of the new system are available on the [MACC web site](#).
- **MACC regional air quality forecasts available on web site.** MACC has been providing [European air quality forecasts](#) since the start of the project, ensuring service continuity from GEMS and PROMOTE. Upgrade and migration to a new plot and data server is ongoing.
- **MACC support for [HIPPO-2](#) aircraft campaign.** The MACC Observational Field Campaign Service provided automatic production and dissemination of ozone, carbon monoxide, and aerosol [forecast plots](#) to the HIPPO-2 campaign.
- **MACC extends GEMS reanalysis.** MACC extended the GEMS global reanalysis to cover 2008 and the first 4 months of 2009. Results are available through the [Global Reanalysis Service](#).

MACC is a Collaborative Project (2009-2011) funded by the European Community under the 7th Framework Programme. It is coordinated by the European Centre for Medium-Range Weather Forecasts and operated by a 45-member consortium.
